DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 1 2-, 6-8, and 10-11 rejected under 35 U.S.C. 103(a) as being unpatentable over Ferraris et al. (US 20030022883) in view of Tweedy (US 6,175,037). The claims are reasonably and broadly construed in light of the accompanying specification, to be disclosed by Ferraris as comprising:

a process for drying or concentrating a biodegradable polymer in a solution or a biomass comprising submitting said solution or biomass to microwaves for a period to reduce polar solvent concentration from said solution or biomass wherein said biodegradable polymer acid at paragraphs [0118], [0130], [0399], and [0543]. Ferraris discloses the claimed invention, except for the specific times, polymers, and degradation levels. It would have been an obvious matter of design choice to recite those specific values, since the teachings of Ferraris will perform the invention as claimed, regardless of the specific times, polymers, and degradation levels. Furthermore, Ferraris discloses the claimed invention, except for the claimed polymer group, polyester or polyalcohol selection, microwave frequency and power, degradation level, solvent type, polyhydroxyalkanoate group, or polar organic solvent group. Tweedy, another process for drying or concentrating, discloses those features at column 2 line 65 through column 17 line 13. It would have been obvious to one skilled in the art to combine the teachings of Komanowsky, with the features of a polymer

group, polyester or polyalcohol selection, microwave frequency and power, degradation level, solvent type, polyhydroxyalkanoate group, or polar organic solvent group for the purpose of effectively using microwave energy in a wide variety of materials, energy levels, and/or frequencies.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
